

Risk Factors and Change Delivered Category

A recent issue has come up regarding Clerk's having access to assign Risk Factors in a limited situation regarding Change Delivered Category.

- If a BF mother only has the Risk Factor, "Breastfeeding Mother of Priority 1 infant", "Breastfeeding Mother of Priority 2 infant", or "Breastfeeding Mother of Priority 4 infant" assigned to them, when a Clerk goes in to Change Delivered Category, it will show the below screen.

mom test
11591944 Gender Female
DOB 12/01/1986, 30 Years

WIC Active BF
Cert. Period 02/13/2017 to 11/30/2017 Delivery Date 11/30/2016
Priority 1

Change Delivered Category mom Notices mom

Current WIC Certification
Category BF Eligibility Begin 02/13/2017 Eligibility End 11/30/2017 Priority 1
Pregnancy End Date 11/30/2016

Currently Assigned Risk Factors

Recorded	Assigned Risk	PP Priority	High Risk	BF Priority	High Risk
02/13/2017	Breastfeeding Mother of Priority 1 Infant			1	

The client does not have risks assigned that make them eligible in the PP category.

[Go to Assign Risk Factors](#)

Save Cancel

- Because there are no other Risk Factors assigned to this mother, the screen enables the "Go to Assign Risk Factors" link in order to assign the mother risk factors to switch her to PP category.
- Unfortunately, KWIC currently incorrectly enables this link for those staff with Clerk clearance. Please remember that as a Clerk, you cannot assign risk factors. If this situation happens, please cancel out of this screen and have an RD/RN continue this process for you.
